

Comment on the Supreme Court order dated 28 February 2019

“Even as we await the written order, we welcome the apex court’s decision to scrutinize evidence of all claims. We believe that this will ensure greater transparency as the judicial scrutiny by the Apex Court will also include evaluation of claims based on satellite imagery analysis by FSI as ordered earlier. We hope that this order by the Apex Court will ultimately deliver justice to India’s forests and wildlife which do not have a voice or a vote as well as legal claimants”.
